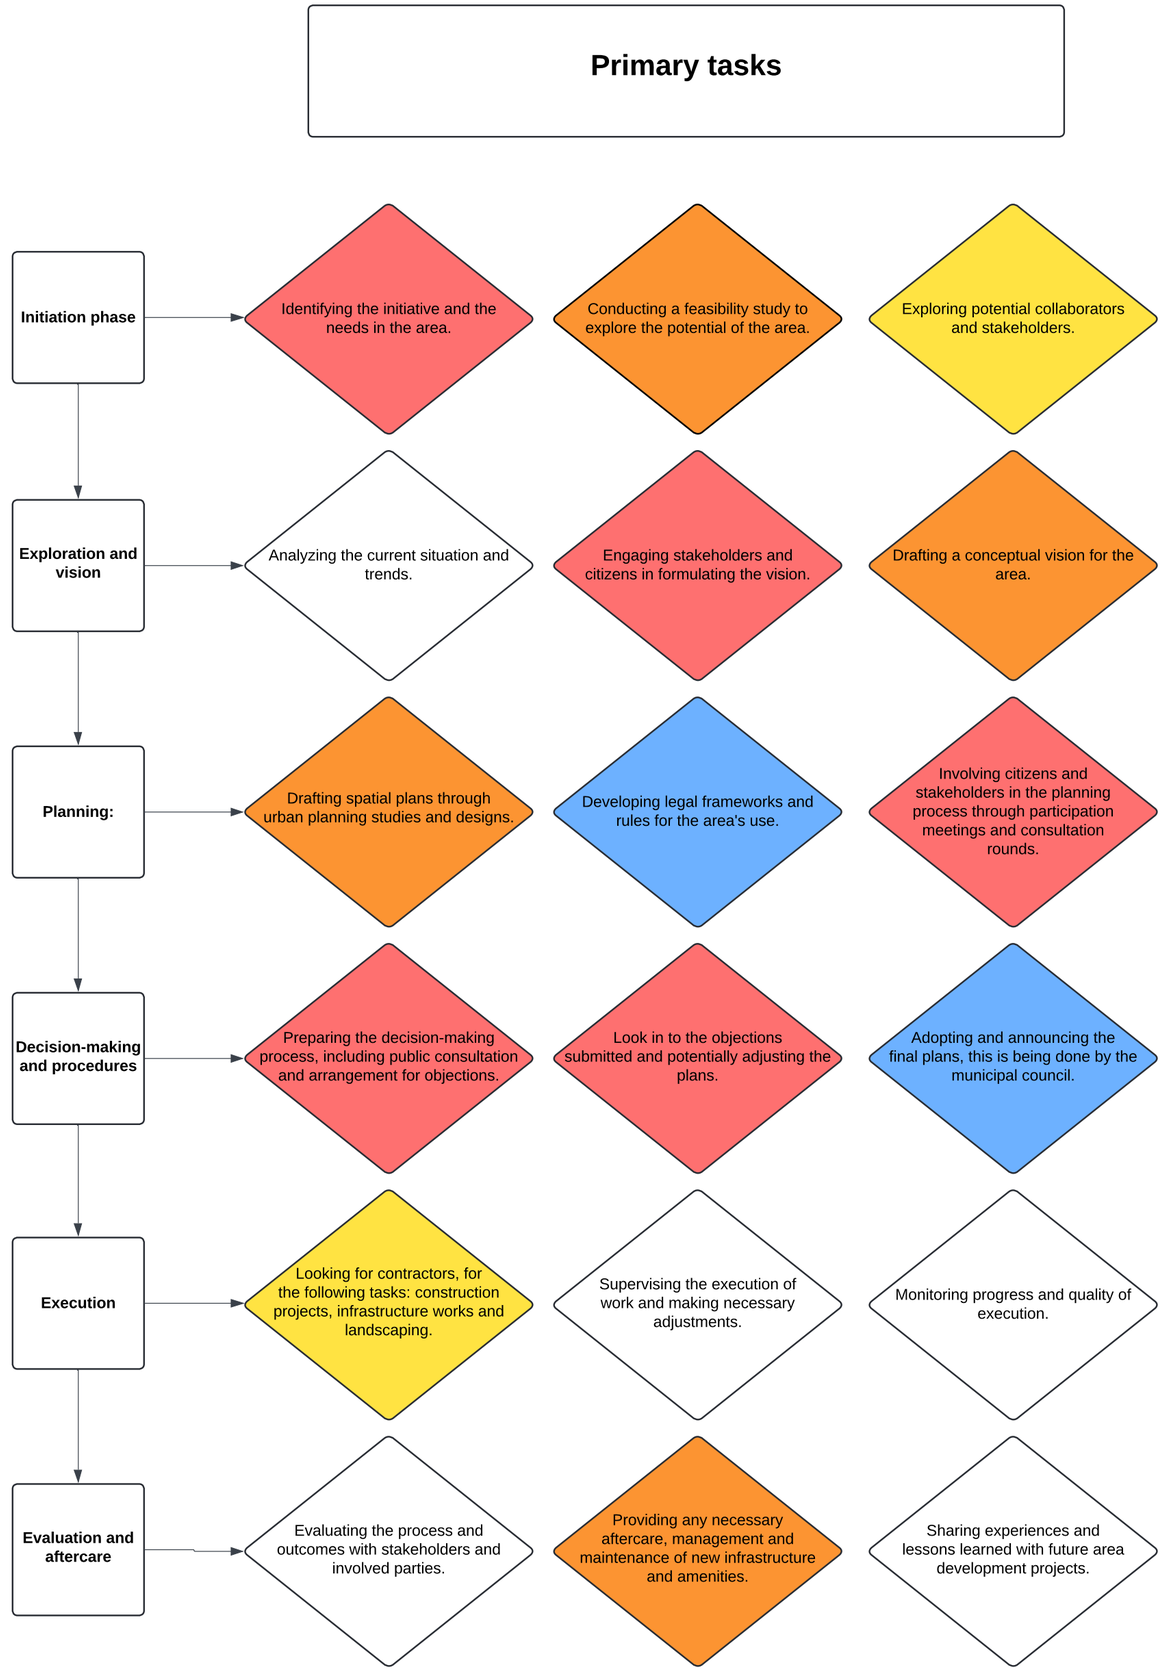
environmental
political
technical



Primary tasks
Initiation phase
Identifying the initiative and the needs in the area.
Conducting a feasibility study to explore the potential of the area.
Exploring potential collaborators and stakeholders.
Exploration and vision
Analyzing the current situation and trends.
Engaging stakeholders and citizens in formulating the vision.
Drafting a conceptual vision for the area.
Planning:
Drafting spatial plans through urban planning studies and designs.
Developing legal frameworks and rules for the area's use.
Involving citizens and stakeholders in the planning process through participation meetings and consultation rounds.
Decision-making and procedures
Preparing the decision-making process, including public consultation and arrangement for objections.
Look in to the objections submitted and potentially adjusting the plans.
Adopting and announcing the final plans, this is being done by the municipal council.
Execution
Looking for contractors, for the following tasks: construction projects, infrastructure works and landscaping.
Supervising the execution of work and making necessary adjustments.
Monitoring progress and quality of execution.
Evaluation and aftercare
Evaluating the process and outcomes with stakeholders and involved parties.
Providing any necessary aftercare, management and maintenance of new infrastructure and amenities.
Sharing experiences and lessons learned with future area development projects.
